

# Senior Blockchain Engineer - UI

[saito.tech](https://saito.tech)

**Role:** Module architecture, UI and Browser Engineer

## Key Responsibilities

- Improve the core Saito software applications and supporting tools
- Implement best practices in coding, organization, and project management
- Modularize key components
- Community outreach and engagement
- Create/Manage/Commission - PWAs, Browser Plugins and Electron Apps

## Details:

We are seeking a candidate capable of stepping into and own Saito's module development. Experience with blockchain software is not required, although intelligence is. This is a great opportunity to really learn blockchain. The candidate will be expected to become an expert on Saito module development, and take responsibility for them from architecture to improving the look and usability of our key applications: email, facebook, reddit and more. This will require several years of experience with CSS and node.js.

Candidates should be articulate and able to represent the Saito project in public. They should also be skilled at onboarding and working with distributed community teams and enjoy the opportunities and challenges this brings.

## Required Skills

HTML, CSS, Javascript, CSS, framework agnostic.

## Remuneration

Base Salary: to be discussed.

Generous Equity/Token Package

Benefits:

- Health and Travel Insurance
- Relocation Costs Considered
